

Science Discoveries

In 1628 Harvey saw blood circulate
Red blood cells were found by Swammerdam in Amsterdam
Hooke used his microscope in 1663
To see the cells in plants it was great for botany

Chorus:
Science discoveries, way back in history
Science discoveries, way back in history

1668 spontaneous generation
It was the idea that was sweeping 'cross the nation
With an experiment by Francesco Redi
He put an end to that miscalculated theory

Chorus:

Anton Leeuwenhoek in 1676
Used his microscope to see the first protist
Joseph Priestley in 1771
Found plants photosynthesize to get all their work done

In 1856 Louis Pasteur found
What produces fermentation he could hear that bubbling sound
Darwin came up with his natural selection
In 1858 it was a biological sensation

Chorus:

Gregor Mendel in 1865
His crossbreeding of pea plants made genetics come alive
In 1928 it was Alexander Fleming
He found mold on a piece of bread and called it penicillin

Chorus:

In 1953 Mr. Crick and Watson
The double helix structure was a DNA solution
Like these scientists and their discoveries
You could be the next to make science history

Chorus:
Science discoveries, you could make history
Science discoveries, you could make history
